

## ROTARY AMPERAGE CONTROL

Remote amperage controls provide welding machine contactor on-off, activate gas and/or water solenoids, and provide full range current output control. Handle styles include Velcro™ straps where one size fits all handle diameters and retrofits easily on all makes of torches or built into the handle as original equipment. A built in strain-relief prevents the control cord from being pulled out or damaged.

- Replace foot pedal amperage controls with fingertip operated amperage controls
- Velcro strap allows amperage control to quickly mount on any TIG torch or Stick electrode holder
- Amperage controls available as a complete handle assembly
- Fits most popular TIG machines
- Custom lengths available up to 200 feet
